YOUR PROJECT

State in no more than 100 words the problem(s) your project is aiming to address

NYAYAMITRA aims to address the challenges faced by lawyers and legal professionals who need to manually analyze large volumes of legal documents — a process that is time consuming and often inefficient. By allowing users to upload their documents directly into the system, NYAYAMITRA provides a platform where legal professionals can quickly query specific legal questions. The application then generates accurate, context-aware answers.

Will the information or artefact resulting from your project be available externally to the University?	YES / NO If yes, please complete an External Agreement Form
